RE: Height Restriction Clarification

Please note that height restrictions required by the Kiawah Island ARB are measured to the ridge height of the dominant roof form. Possible exceptions may include minor ancillary elements such as chimneys.

Further note that some ridge heights are measured from base flood elevation and others from natural grade. Maximum heights also vary from neighborhood to neighborhood and are subject to zoning changes. Please verify ridge height maximums with the ARB office prior to review submittal.

Thank you in advance for your cooperation.
